

What do the top 10 hospitals have in common?

SO RELIABLE, IT'S THE #1 DATABASE IN HEALTHCARE

All of the hospitals ranked in the top 10 in the latest U.S. News & World Report annual hospital survey use database management systems from InterSystems.

These respected institutions, with deserving reputations for world-class excellence, seek out the most reliable, highest performing and most cost-effective information technology available to maintain their leadership.

Which is why InterSystems' database products are the lifeblood of so many leading hospitals in the United States, and around the world in 88 other countries.

If you would like to have something in common with the leaders in the health care industry, take two aspirins (for your database headaches) and call us in the morning.
