

Achieve real-time visibility of your product's clinical performance.

There's no faster, easier way to:

- > **Maximize product performance with clinical intelligence** to optimize product design and use.
- > **Rapidly generate families of outcome and clinical experience publications** by registry mining.
- > **Systemize reporting of serial endpoints** at 30d, 90d, 6mo, 1yr, 3yr, and beyond.
- > **Scale trial-on-trial data into a critical mass** of integrated knowledge suitable for meta-analysis.
- > **Correct post-market data deficiencies** that the FDA has targeted as a fundamental quality problem.

Patient Data Registries

Patient Data Registries Deliver Real-Time Visibility

Our Turnkey Solution delivers total infrastructure and support, including:

- > HIPAA final rule-compliant securitization and de-identification of Personal Health Information.
- > Procedures, physical safeguards, security mechanisms, and employee training.
- > Legacy data "load and leverage" to maximize ROI with meta-analysis and mining.
- > Responsive, experienced, and certified IT, regulatory affairs, quality, and clinical development professionals.

About clinivation

Clinivation's business is productivity- taking the time and labor out of making better medical products.

Since 1999, our productivity software and solutions have delivered superior value to market leaders in medical devices, pharmaceuticals, and diagnostics.
